## **Welcomes Hal Kneller Back as VP of GBS Global Sales**

**June 9, 2017**

GBS is happy to announce the return of Hal Kneller to his original position of VP of GBS Global Sales. Hal has just returned from a 4 month cruise around the world. We'd like to think he was doing research for worldwide opportunities for GBS Maxxcasting™ and ZoneCasting™ Systems, but in reality, he was taking a well-deserved vacation after 40 years of service in the broadcasting industry.

As many of you know, Hal is a well-respected industry professional who has spent many years as a sales representative for GatesAir (formerly Harris), Nautel, and iBiquity and was also as a radio station owner. These positions have given Hal a very broad understanding of the needs of broadcasters and the solutions to many of their engineering issues.

Hal spent 3 years at GBS before his hiatus and is intimately familiar with the GBS Maxxcasting™ System and its ability to help radio broadcasters fill in areas of their signals that are weak due to terrain problems or signal strength issues toward the edge of their contours. Please give Hal a call to welcome him back and to ask him if the GBS Patented MaxxCasting™ System can help fill in any signal issues your station may have.

Hal can be reached at [hal@geobroadcastsolutions.com](mailto:hal@geobroadcastsolutions.com) or (941) 347-8415.
